On PCs I like Hypersnap.

Cheers,

David

: each WIDGET_DRAW object within the application but what about the whole
: works after it is realized ?

On Unix, try xv

On Mac, try command-shift-4,
then use GraphicConverter to convert the PICT to the format of your choice.

On Windows

Press the PRINT key it's above the INSERT button and right from F12.

After that you can INSERT the image in every program you like.
