I'm using Motif under CDE and OpenVMS and I change the font size/style

by using the FONT keyword to widget commands.

e.g. My_button = WIDGET_BUTTON(.....,/FONT='Helvr12')

My_button = WIDGET_BUTTON(.....,/FONT='Timb10')

The available fonts can be found using XFONT and selecting "Private".

Hope this helps,
Ian

Widget_Control, Default_Font='Helvetica*14'

Cheers,

David

Thank you Ian,

But as I have now my dialogs all written, I do not want to go through
all the files and add a font parameter to so many widgets.
Under CDE my dialogs using a large font, under KDE a smaller one.
So how can I set this globally and not only for button widgets?
Is there an environment variable or better an global IDL variable to
set?

thanks, :-) marc
