Try

```
a=findfile('///address/public/*.*')
```

I tried it and it did not seem to work. No string value was returned.

When I go into "Map Network Drive" on my NT, it comes up with drive H:. Under path it lists

\\8100NTSERVER\8100 Files

I have tried

```
a=findfile("\\8100NTSERVER\8100 Files')
```

This does not work.

Anybody have any suggestions?

thanks-Peter Brooker
