Subject: Flipping Integer*2
Posted by dean on Tue, 21 Sep 1993 22:01:01 GMT

I have a data base created on a VAX/VMS machine with values that are integer*2. I am attempting to read these files from a PC using IDL, but the numbers are all wrong. I suspect I need to flip the bytes in the integer*2 to get the right number. Can someone tell me how to do this with IDL.
