Hi,

where did I get an information if a variable of an anonymous structure is changed?

Is there something like creation and modification time available for a defined structure?

```
a={b:1}
```

```
help,a,/str
```

```
** Structure <133c5b8>, 1 tags, length=2, refs=1:
```

```
  B          INT          1
```

```
a.b=2
```

```
help,a,/str
```

```
** Structure <133c5b8>, 1 tags, length=2, refs=1:
```

```
  B          INT          2
```

Reimar
