And indeed it is not, with your idea it only takes about a millisecond.

Thanks a lot!

Koen

IDL is sometimes considered a loopy language, but
it is definitely NOT a looping language. :-)

Those FOR loops are killing you. Try something
like this:

```
openr, ms_dat_unit, ms_dat_file, /get_lun
ms = bytarr(dimx,dimy,dimz)
readu, ms_dat_unit, ms
free_lun, ms_dat_unit
```

Cheers,

David

Hi,

you don't need the loops
try this

```
ms = bytarr(dimx,dimy,dimz)
openr, lun, ms_dat_file, /get_lun
readu, lun, ms
free_lun, lun
```

hope this helps

Ivan
