## Subject: CALL\_EXTERNAL with Windows DLL Posted by Haje Korth on Wed, 23 Feb 2000 08:00:00 GMT

I know it is hard to find answers for CALL\_EXTERNAL questions since the literature on this subject is rare and RSI is not very helpful with their manuals either.

But maybe someone knows...

How do I compile a DLL for Windows with the Lahey Fortran compiler LF95 that can be used with IDL. My questions has two parts: What are the compile options for LF95 and how does the call external statement look like? I worked all this out on for the SUN compiler but for Windows I have no clue....

Help would be greatly appreciated. Haje
