Subject: IDL and 3D Image Posted by Quanyu Zhu on Tue, 29 Feb 2000 08:00:00 GMT View Forum Message <> Reply to Message

Hi:

I currently worked for a company to produce the chemical images. We already have the 2D image, now we are planning to display 3D image. The image looks like a blob scattered around the 3 dimensional axis. I just tried to find a s/w package to work on this. I have tried Java 3D API, but it provide more graphical 3D display, not support image display, which means I don't want to change my raw 3D image to roaster image and display, it really take a long time and not a good approach.

Can someone tell me IDL can give me a good support to display my 3 dimentional array directly?

Thanks!
