Hi,
I have a couple of measurements and like to calculate the time between
them. But I am not sure which routine to use.
I tried the following but the result is confusing
IDL> diff=JULDAY(3,17,2000,17,30,22)-JULDAY(3,17,2000,15,22,17)
IDL> print,diff
0.088946760
IDL> CALDAT, diff, Month, Day, Year, Hour, Minute, Second
IDL> PRINT, Month, Day, Year, Hour, Minute, Second
1 1 -4713 14 8
5.0000381
Thanks for help
Mirko
