Subject: NCSA HDF in IDL?
Posted by sjt on Fri, 26 Nov 1993 16:18:03 GMT

I have seen references to routines for accessing NCSA HDF files from IDL in several postings in this newsgroup. I have a system that works on VMS but I haven't been able to get it working on SunOs or Solaris. So I would be very grateful if someone could point me in the direction of a system that works on Unix platforms.
