Subject: Happy ending: compiling libraries for call_external() on the Mac
Posted by arkos on Mon, 17 Apr 2000 07:00:00 GMT

Hi,

Just a follow-up to my request for info on compiling shared libraries
for use by IDL on the Mac via call_external(). I wanted to thank a
senior RSI engineer who, of his own initiative, saw my post and
forwarded a solution specific to my situation. A big thank you to
him, and kudos to going that extra mile to help out. It was much
appreciated!

Cheers,

-- Greg
