Hi

When I try to run IDL 5.3 on my SuSE Linux 6.1 system I got the following error message:

```
/usr/local/rsi/idl_5.3/bin/bin.linux/idl: error in loading shared libraries
```

```
/usr/local/rsi/idl_5.3/bin/bin.linux/libidl.so.5.3: undefined symbol:
```

```
fetestexcept
```

How can this problem be solved?

Christian
