
Subject: Pretty-printing IDL code?

Hi group!

Does anyone here know a printing program that knows about the IDL syntax and can produce nice-looking printouts (e.g. grey comments, bold keywords etc.)?

I'm working on Unix, PostScript output would be preferred...

Peter

Wow, indeed!
I had an old version of a2ps that did not support sheets :-(
Now I've upgraded and I'm completely happy with it.
Thanks!
