
Subject: reading a Mac text file on Windows

All,

I have an ascii text file that was created on a Mac that now resides on Windows. I need to be able to read this into IDL on Windows, but so far I have had no luck. (On a Mac the end of line is a linefeed, on Windows it is a carriage return/line feed. On Windows, IDL thinks this is a one line file). I would like some IDL technique to read this, but if someone has some C code that can do it I would be interested.

Thanks

Ronn Kling
