I've got some arrays with data. None extend past 3 decimal places.

```
'print, filterfunc(0,0,half1), filterfunc(0,0,half2+200)'
```

produces:

```
'537.100    528.300'
```

```
'print, filterfunc(0,0,half1) - filterfunc(0,0,half2+200)'
```

produces:

```
'8.79999'
```

What's up with that?

Simon
