Subject: FYI: VIP 1.3 is released
Posted by Dave Uhlir on Wed, 19 Jul 2000 07:00:00 GMT

The latest version of VIP, Visual IDL Programming, is released.

VIP 1.3 is full-featured visual environment for developing data analysis and visualization applications. New to this version is the capability to generate IDL source code (.pro files) from VIP programs. Also new is the addition of visual cues to improve the self-documenting features of VIP's visual programming editor.

Here are some other features new to VIP 1.3:
+ Conditional execution of nodes (if/then/else)
+ Additional Object Graphics nodes
+ Branches which indicate direction of data flow with arrows
+ Snap functionality in visual editor to align nodes to a grid
