You, too, Martin!?

I nominate Ben for bug fixer of the year. You can't sneak anything by him. I've spent more time object programming since he got interested in the darn things than I **ever** did before. :-)

Cheers,

David

P.S. I'm glad to see I'm not the only one whose life has been taken over by objects. I'm telling you, once you've had the epiphany **any** problem looks like an object solution. Although my lovely wife has resisted my attempts to organized the household along these lines. :-(
