Eucalypt Software - Makers of Autopost & Rocketfuel --- Ripped Me Off!!!

-

All potential buyers should be warned to steer clear of this company. They have a repeated pattern of ripping people off and ignoring requests for support.

-

I know someone who sent in the \$10 registration fee for Autopost TWICE (thinking the first one may have gotten lost) and in both instances, never got a registered version of the program and all of his emails were completely ignored.

-

I myself purchased Rocketfuel on-line and had to pull teeth to get an unlock code. The web site was very quick to take my money, but no registration/unlock code came for days and days. I repeatedly emailed them, only to receive nothing but autoresponses. After 5 days I sent them a message stating that if I did not have a working version of the program by the close of business that day, that I would challenge the credit card charge. Magically, the code arrived several hours later.

-

What kind of way to do business is that?

-

In any case, its academic... there are other products available for free that do virtually the same thing and I only wish that I had known about them before I wasted my time with Eucalypt Software.

-

If your in need of automatic news posting software, there is nothing better than "NNTP Power Post 2000".

It's graciously been made available free from the following web site:

-

<http://net-toys.8k.com/>

-

Save your money... your time... and the aggravation!

-

Peace,

-

PPN

-

-

PS: I have no affiliation with the makers of PowerPost 2000.
