Hi Folks,

The Exam Committee chairman has run off with the secretary over in the Bookstore and no one seems to know when he is coming back. So I've been asked to get a couple of exam questions together. I don't want to be unfair or anything, so I thought I would throw out a test question to see if I'm on the right track.

Ready?

What is the *real* purpose of the DIST function?

Cheers,

David

That's the second time I've seen him do that lately. You know, I just bet that there's gonna be a question or two on polymorphism this time, never mind that it never came up in any of the past papers.

Whoops! I'm giving away too many clues. I've already been
hit with a disciplinary letter in my file for too
many "gul'durn off-topic posts". I can't afford
another one. :-(

Cheers,

David
