How does one get the cursor in a text widget to jump to the next input field  
when pressing CR?

...

I did the following:

NAME = TAG\_NAMES (EVENT, /STRUCTURE\_NAME)

CASE NAME OF

```
"WIDGET_TEXT": BEGIN
  POS = WHERE ( T_EV EQ EVENT.ID )
  POS = (POS(0) + 1) < (N_LIST-1L)
  WIDGET_CONTROL, T_EV(POS), /INPUT_FOCUS
END
ENDCASE
```

where T\_EV is a long-array with the events according to the different  
TEXT\_WIDGETS.

Karl
