
Subject: seeking CALL_EXTERNAL examples...

Hello all,

I am looking for some reference material or code examples (IDL and C) which use the IDL call_external command. Are there any good books which thoroughly discuss external C and IDL programming in detail? I'm not too interested in programming graphics or widgets, just text-based I/O and number crunching. I am reading through Ch. 7 of the IDL External Development Guide, but I'm finding quite a few pitfalls.

Many thanks,

Randall
