
Subject: Try OPENDX as an IDL/Wave alternative
Posted by [Randall Skelton](#) on Wed, 08 Nov 2000 08:00:00 GMT

I remember this thread from some time ago...

As for a free alternative to IDL you may be interested in opendx (after IBM's data explorer). When IBM dropped data explorer it released the source to the public and 'opendx' was born.

I find it easier to use than IDL and far more flexible for data formats.

Check it out at <http://www.opendx.org>

Randall
