I am doing some research as a requirement for my MBA at Endicott College
in

Beverly, MA. My research paper is on the relationship between
programmers

and managers, specifically, how performance appraisals are done. I have

over 20 years programming experience and this has always interested me.

If you would be kind enough to answer my questions at
<http://home.psouth.net/thecaseys/q1.htm> it would help me greatly.

Thank you,

Steve Casey
