
Subject: restore of old ROIs doesn't work under Envi 3.4

WE just upgraded from Envi 3.2 to 3.4 (we skipped 3.3 due to inertia, apathy and not wanting to screw up what was already working at the time). When I loaded an old image and tried to restore an old ROI, I got the following message:

'Input ROIs: An error has occurred during processing
Error: "Variable is undefined: INFO_STR." The result may be invalid.'

The ROI was not loaded. I have tried this with multiple images.

Has anyone encountered that problem and is there an easy fix (short of redoing all my ROIs-ugh!) ?

Thanks
