
Subject: How to get list of printers on NT?

I'm using IDL 5.3 on WinNT 4.0.

Is there a way to get the list of available printers on an NT box? I'm aware of DIALOG_PRINTERSETUP, which presents a list, but I'm trying to make a Unix-centric IDL program work under NT and it has its own printer setup dialog window which isn't quite the same as the one presented by DIALOG_PRINTERSETUP.

Thanks,

Dave
