Hi,

please give me a hint how to install an idl dongle
for idl5.4 with win2k.

I tried hwrl.exe but the code wasn't accepted.
The code is right because it works with other window versions.

regards
Reimar

I won't know where all and not where all.
look yourself at www.creaso.com

You just wait there in Denmark:-) They (CREASO) already conquered The Netherlands a few years back. They are friendly enough, though - see the original thread.
