Subject: plot structured data Posted by Dirk Burose on Fri, 09 Mar 2001 16:57:21 GMT View Forum Message <> Reply to Message

Dear all,

perhaps this is a typical newbie question, but I just started to use the read_ascii function. I like to know if there is an easy way to make a plot out of structured data espcially surface or contour plots. I have a ascii data set with 15 columns. I am able to extract the structure I like with struct_assign but what happens next. Perhaps somenone can help me

thanks Dirk
