Sorry for replying to my own mail. But at least for german readers it might be important to clarify that the salary is of course BAT IIa/Ib (instead of IIa/I).

Yeah, I was going to ask about that. What does that mean for American readers?

Cheers,

David

... that you should bring you rown food and a sleeping bag ;-) [just kidding]. Th eexact salary depends on several factors such as age, marital status, children, years in the public service (or equivalent) sectors, A rough estimate yields about \$45,000 per year net, which will leave you with on the order of \$25,000-\$30,000 after taxes, social security, etc.

Cheers,

Martin
