Yes.

Cheers,

David

Well, I could take a guess, but why don't you put that question mark in *front* of the arrow and find out:

IDL> ? arrow

Cheers,

David

P.S. Is it just me, or have we seen the alpha and omega of IDL expertise this week?

"Alpha children wear grey They work much harder than we do, because they're so frightfully clever. I'm really awfully glad I'm a Beta, because I don't work so hard. And then we are much better than the Gammas and Deltas. Gammas

are stupid. They all wear green, and Delta children wear khaki. Oh no, I don't want to play with Delta children. And Epsilons are still worse.
