
Subject: Tab Widgets?

Hi All,

Is there a WIDGET_TAB or some such function that creates a tab widget? By tab widget, I'm referring to a GUI that where you switch between different windows by clicking on file folder-like tabs (Much like the way one can switch between "Groups" and "Build Order" in the IDL 5.4 DE)

Thanks in advance.

PS If responding by e-mail, please send messages to fulton@dansas.usask.ca
