Hi IDLers,

Has any one used the SOCKET function successfully?

I have tried the Craig Markwardt suggestion from an earlier post without any success.

```
> socket, unit, 'cow.physics.wisc.edu', 80, /get_lun
> printf, unit, 'GET http://cow.physics.wisc.edu/~craigm/idl/idl.html'
> text = "
> while eof(unit) EQ 0 do begin
>   readf, unit, text
>   print, text
> endwhile
> free_lun, unit
--
```
