
Subject: saving DICOM files in ENVI

I've been having trouble saving files that I've loaded into ENVI with the READ_DICOM method.

I use the ENVI_OUTPUT_TO_EXTERNAL_FORMAT with all the arguments and it returns with "RESIZE_DOIT: Invalid Procedure/Function" (or something of the like.

If someone could help, it would make life(and work) a lot easier.
And if I can clarify anything just ask.
