
Subject: Editor feature?

When I change the default font size for editor windows in Preferences (5.4, MacOS) to anything other than default, what I get is an increase in the tab length to something totally crazy, despite looking perfectly fine in the Preview provided in Preferences. One tab is about half screen wide. And there is no way to make it small again, except deleting IDL preference file. Any suggestions, Thierry? I would love to have default font anything better than 8 pt Monaco :-(

Cheers,
Pavel
