
Subject: polar contours over maps

Hi,

I am trying to plot a set of polar contours over a map. I have used the map_set command and have set the map extents using the limit keyword. When I come to plot the contours on the map I have been using the overplot keyword, but it says that my value of latitude is out of range, and the contours do not appear as they should over the map. Does anyone know why this is happening and what I can do about it?

thanks

Ann
