The PROFILER at least gives information about the time spent in routines:

```
IDL> profiler, /system
```

```
IDL> for i = 0, 9 do $
```

```
IDL>   foo = smooth( rebin( randomu( seed, 100, 100 ), 200, 200 ), 5 )
```

```
IDL> profiler, /report
```

Module	Type	Count	Only(s)	Avg.(s)	Time(s)	Avg.(s)
RANDOMU	(S)	10	0.055057	0.005506	0.055057	0.005506
REBIN	(S)	10	0.032079	0.003208	0.032079	0.003208
SMOOTH	(S)	10	0.036360	0.003636	0.036360	0.003636
