Subject: playing sound from within IDL
Posted by John Votaw on Thu, 20 Sep 2001 20:36:23 GMT

Does anybody know how to play a portion of a .wav file from within IDL?
I currently output the substream with write_wav() and then use
RealPlayer to hear it but this is too cumbersome. I'm running IDL 5.4
on a windows 2000 pc.

I noticed a DLM that may do what you want on Ronn Kling's site:
 http://www.rlkling.com/freeware/randallfrank.html

good luck
