I do not know if this will help you:

- 1) Be sure to use RETAIN=2 when calling WIDGET_DRAW()
- 2) I have got a similar problem:
when reading cursor-coordinates in a loop, p.e.

```
repeat begin
  cursor, xc, yc, /wait, /devi
  print, xc, yc
endrep until !mouse.button ne 4
```

While being in the loop I am NOT able to scroll, however
outside I am.
I have not overcome that problem yet.

Karl
