No, IDL won't do it. You may have to take your files to someone with a computer with more horsepower. Kinko's will probably be able to do it for you, if you can't find a colleague with Illustrator or Photoshop.

Cheers,

David

"Horsepower" is probably not the right word.

"More pasture"?

Cheers,

David

This is amazing. I was at this very minute searching google groups
comp.text.tex and comp.lan.postscript for rgs to cmyk solutions.
(there was nothing found in this newsgroup)

The results of my search is that it is hard to do, there are many algorithms
to do it (because any one alg may not produce good results for certain
cases) and it seems you have to buy some software to do it.

One such package seems to be adobe illustrator (as suggested by JGR).
The Kinko's suggestion is a great one, and is what I'll be telling my
colleagues to do.

Thanks dave!

Be prepared for a flood of cmyk posts, since AGU seems to have changed its specifications for submitting camera ready manuscript, in that they do require CMYK for color (or maybe they have always been that way IDK).

Cheers,
bob

PS

Barry "my figures are too large for the amount of memory "
um, how bout cranking up the virtual memory to >10 gigabytes or there
abouts.
(It'll be a slow swappy mess, so leave it running when you go home. :))
If it is a one page postscript file that is that large (100M) how about
converting
to an image file (TIFF for instance), then doing the color seperation?

Hi Barry,

here is what we ended up doing. We are submitting to an AGU journal,
which requires CMYK eps or TIFFs. I read in the postscript figure in
question

(produced by IDL) into Paintshop pro (an inexpensive Windows program
by Jasc Software). I used that program to create a CMYK TIFF files
(compressed)
and submitted that.

You can download the paintshop pro program and take it for a 30 day (?)

trial. I find it comes in handy for image editing.

Cheers,
bob

I asked sometime ago the same question. At the moment it is not supported.
Please do a feature request by RSI too.

regards
Reimar
