I'm sitting here, still trying to understand the thinking of RSI's management. I can't believe they'd be so clueless as not to realize that the reason the Mac OS 9 IDL license sales dropped off precipitously was the RSI announcement (in March) that an OS X version was coming out --- why waste money on a Yugo when a Lamborghini was in the offing, for the same price?

But, nah, they're professionals. That couldn't possibly be it.

Ya think?

Joe Gurman
