In order to keep you informed of our situation, here is a status report on our investigations into an intermediary solution for IDL on the Mac platform:

- we are making progress in our investigation and will announce our determination late this week or early next week. we are moving as fast as we can.

- we are currently sorting through the following issues:

- support for the AltiVec processing engine.

- graphics performance.

- the logistics of supplying X-Windows support and how to distribute the X-11 server library.

- as soon as we have reached a conclusion, we will immediately publish an announcement on this site. please stay tuned.
