Hi,

I have a problem with the idl command line.

If I am using only idl not idlde I can't toggle between the commands I have already used.

What did I have to set somewhere?

regards
Reimar

A new employee here had the same problem if he did not use a true Xterm. Console windows apparently are not sufficient for scrolling through the history.

This is a good idea, I found out that's I only have to switch the keyboard to linux Konsole.

(right mouse click in the window)
