Hi,

is there any possibility to increase the resolution for TIFF-files? For purposes of publication the highest resolution of 100 dpi is not very satisfying. Enlarging the size of the xobjview-window (xsize, ysize) gives me an ugly error-message (within a never ending loop).

Thanks again for some help

Harald

The world is a cruel, cruel place. Here is one place where you have to choose your poison, I'm afraid. :-(

Cheers,

David
