RSI has WWW page on IDL in general:

http://sslab.colorado.edu:2222/projects/IDL/idl_ssl_home.htm |

Hal Mueller at Texas A&M put together a Digital U.S. Map browser based on images I created using IDL:

<http://ageninfo.tamu.edu/apl-us/>

E. Loren Buhle, Jr. Ph.D. made a page on AVS IN MEDICAL TREATMENT PLANNING which also discusses IDL:

http://archive.xrt.upenn.edu/0h/buhle/manuscripts/avs94_pape r.html

It might be worth keeping some of the best such pages in the FAQ.

I'm working on an News Archive using Mosaic Forms & cgi's as frontend to a freeWAIS indexed Archive of messages from comp.lang.idl-pvwave since 1991 with time range and boolean search facilities and daily updates. The announcement in the news group follows one of the next weeks. Alpha testers are welcome, please send me a note. There will be pointers to other IDL related http sources on the net. These html references are already included below as a shar archive. If some knows other sources to

append, let me know...

Cheers, Thomas
