Subject: Getting checkbox value Posted by redlmg98 on Tue, 08 Jan 2002 18:06:23 GMT View Forum Message <> Reply to Message

I am trying to get the value of a checkbox...meaning I would like to know if the checkbox is selected at a certain time. I have looked through the references under widget_control and widget_info but neither of these keywords seem to return if a checkbox button has been selected or not. Did I overlook something?

Cheers, Lisa Gandy
