Subject: getting hostname, sharename Posted by timothy.williams on Mon, 14 Jan 2002 17:34:03 GMT View Forum Message <> Reply to Message

Is there a way to find out the host I'm on? Even better, can I found out what the sharename is given a pathname? I'm using IDL on a PC that is on a network, but I don't have ION. What I have is a pathname such as 'C:\dir\file', which I would like to change to '\hostname\sharename\dir\file'.

Thanks.

Dear Tim

what's with

pc=GETENV('computername')
