Hello All,

I hope everyone had a great weekend.

Back in December Oleg Kornilov posted a call_external routine that read and created AVI movies. With his permission we have turned it into a dll for IDL on windows for IDL 5.3, 5.4 and 5.5. You can download the zip file with the dll, dlm, two test procedures and a help file at.

<http://www.kilvarock.com/freesoftware/dlms/avi.htm>

Andrew Cool also sent me a nice little routine that accesses news feeds from IDL. You can get this at.

<http://www.kilvarock.com/freesoftware/misc/misc.htm>

I hope everyone finds them useful. As usual, if you have any comments please don't hesitate to email me.

-Ronn
