```

How about this attempt at a simpler solution...

```
aq = BIN_DATE( SYSTIME() )  
  
uq = STRING( aq[0], aq[1], aq[2], '_', aq[3], aq[4], aq[5], $  
    format='(i4.4, i2.2, i2.2, a, i2.2, i2.2, i2.2)' )
```

```
return, uq
```

yes indeed! that is a lot more elegant!
thanks a lot mate :)
