Subject: basic soubt with fltarr
Posted by Muks Raju on Wed, 10 Apr 2002 08:30:42 GMT

Hello all...i have a basic doubt with fltarr. I have this fltarr
Actuator   = fltarr(100,4)

now i need to remove the first 3 columns. How do i do this. Also i may
need to add 3 columns at the beginning and at the end or maybe a column
of data in the middle. Ive seen about a million websites and help pages.
None of them seem to be of any help. Could somebody please help me.

Thanks in advance.
