Hello,

i want to show the progress of my program i a text widget.
At the command line i use

```
print, 'Hello' + STRING(10B) + 'World'
```

Output:

```
Hello  
World
```

I the text widget i tried the same but i get only a black square instead of
a LF

```
info = 'Hello' + STRING(13B) + 'World'  
WIDGET_CONTROL, i_text, SET_VALUE=info
```

I think theres only a minor change to do, isn't it ?
