Use the FRAME_RATE keyword in the INIT method of the IDLgrMPEG object.

Cheers,

David

Mmmh, I am not familiar with IDL Objects.
Is there another way or do I have to really understand everything
about objects :-(?
Thanks.

- Thierry

No, you don't have to learn "everything" about objects.

It would be enough to know how to use the IDLgrMPEG object.

It really is no harder than learning how to use, say,
the INTERPOLATE function. You just start with the on-line
help. :-)

Here is an article that will get you started:

http://www.dfanning.com/tips/how_mpeg.html

Cheers,

David
